

Masoud Vafaye Valeh

Senior Backend Engineer & Engineering Team Lead

Stockholm, Sweden

masoud.vafaei@gmail.com — +46 76 746 2352 — linkedin.com/in/msdvafaei — github.com/mvonline

Professional Summary

Senior Backend Engineer and hands-on Engineering Team Lead with over 10 years of experience designing, scaling, and leading backend systems for high-traffic platforms serving over one million users. Strong expertise in Java (Spring Boot), PHP (Laravel), and TypeScript (NestJS), with a focus on software architecture, modern engineering practices, microservices, system reliability, and engineering excellence. Proven ability to lead cross-functional teams, define technical strategy, mentor senior engineers, and align architecture with business objectives across iGaming, Smart City, and AdTech domains. Open to learning and adopting new technologies.

Core Competencies

Backend Engineering: Distributed systems, RESTful APIs, Microservices, Domain-Driven Design (DDD)

Languages & Frameworks: Java (Spring Boot), PHP (Laravel), TypeScript (NestJS), Node.js

Data & Storage: PostgreSQL, MySQL/MariaDB, MongoDB, Redis, OracleDB, InfluxDB

DevOps & Cloud: Docker, AWS, GitLab CI/CD, GitHub Actions, Terraform

Architecture & Infrastructure: Message Queues, Caching Strategies, Linux, Nginx

AI & Automation: LLM Integration, AI Workflow Automation (LangChain, n8n), RAG

Leadership: Technical strategy, team mentorship, Agile delivery, system ownership

Professional Experience

Immense Group — Stockholm

Development Team Lead

Aug 2025 – Present

- Lead a cross-functional backend engineering team delivering a large-scale iGaming platform with 1M+ active users.
- Own architectural decisions for microservices, ensuring scalability, resilience, and operational stability.
- Remain a hands-on lead by contributing to core services, design reviews, and critical implementations.
- Define engineering standards, code quality guidelines, and best practices across teams.
- Mentor senior and mid-level engineers, supporting technical growth and leadership development.

Immense Group — Stockholm

Senior Software Engineer

Feb 2022 – Aug 2025

- Designed and maintained high-performance backend services using NodeJs, Typescript, PHP (Laravel), Docker, and AWS.
- Implemented Redis caching and database optimizations to support high-concurrency workloads.
- Integrated multiple international game providers while preserving system integrity and uptime.
- Improved deployment reliability and release speed through GitLab CI/CD automation.

Farabeen Dev — Tehran

Senior Software Engineer

Sep 2020 – Sep 2023

- Delivered enterprise backend systems for fintech, logistics, and government organizations.
- Built secure APIs and business logic using Laravel and NodeJs.
- Automated reporting and data processing pipelines, reducing manual effort by approximately 50%.
- Led backend optimization initiatives to improve throughput and scalability.

Food Market Hub — Remote (Kuala Lumpur)

Backend Engineer

Jun 2021 – Feb 2022

- Built RESTful APIs and background workers for a supply-chain platform.

- Deployed containerized services using Docker and CI/CD pipelines.
- Improved data consistency across supplier–restaurant integrations.

Adro Digital Advertising Agency — Tehran

Senior Software Engineer

Apr 2019 – Oct 2020

- Developed backend services for an online advertising platform using PHP, Node.js, and Python.
- Optimized multithreading and exception handling for performance-critical systems.
- Designed APIs and SQL queries supporting real-time analytics and reporting.

myDirectHome — Remote (UK)

Backend Engineer

Dec 2018 – Oct 2020

- Built backend services for a real estate SaaS platform using Laravel and Java.
- Designed MongoDB schemas for CRM and property management features.
- Deployed and maintained cloud-based services for international customers.

ICT Department of Mashhad Municipality — Mashhad

Technical Lead

Mar 2013 – Oct 2017

- Led Smart City and e-government initiatives using Oracle ADF, SOA, BPM, and Java EE.
- Architected high-availability citizen service platforms used by millions of residents.
- Coordinated large cross-functional teams and mentored junior engineers.

Open Source Contributions

Laravel Discount — github.com/mvonline/discount-laravel

- Developed a flexible Laravel package to manage application discounts, supporting various strategies like percentage-based, fixed amount, and stackable discounts.
- Implemented features for discount codes, minimum order requirements, and usage limits with an easy-to-integrate API.

Locker — github.com/mvonline/locker

- Created a specialized locking mechanism designed to manage fine-grained locks and improve concurrency by freeing up global locks for other system tasks.
- Engineered the implementation to mirror standard mutex behaviors, allowing users to provide custom keys for resource-specific locking.

Key Projects

FitMind — github.com/mvonline/fitmind

- Built an intelligent health and fitness platform focused on workout planning and progress tracking.
- Developed a user-centric interface to provide personalized training insights and health monitoring.

TV2 — github.com/mvonline/tv2

- Developed a video streaming optimized for high-speed performance and seamless media playback.
- Focused on delivering a responsive user experience for browsing and consuming digital video content.

Education

B.Sc. in Software Engineering

Mashhad University — Mashhad, Iran

2005 - 2009

Languages

English (Professional), Persian (Native)
